PROJECTS

E-commerce Website

Developed a full-featured **E-commerce web application** using the **Java Full Stack** approach. The backend was built with **Spring Boot**, providing robust REST APIs for user management, product listings, cart operations, and order processing. **Hibernate ORM** was used for smooth database interaction with **MySQL**.On the frontend, a dynamic and responsive user interface was built using **React.js**, enabling real-time updates for product search, filtering, and cart management.

Real-Time Attendance System

Built an AI-powered real-time attendance system using **DeepFace with the FaceNet model** for accurate face recognition. The system captures live video through OpenCV, detects and recognizes faces, and logs **In-time** and **Out-time** automatically.It supports new face registration, recognition on re-entry, and maintains a daily attendance log using SQLite.
